

Dr. Lianne Dwyer has a long career in agricultural research and research management. She joined Agriculture and Agri-Food Canada where she finished her career as Science Director at Ottawa. She was also Adjunct Professor at the University of Guelph and McGill. As a physiologist, agronomist, and sustainability expert, she has participated in and led national and international research projects in the US, Brazil, Vietnam, and China. She has also been an advocate for collaboration across the diverse agricultural research and innovation community, and for public policy that recognizes the key role agricultural research and innovation plays in the economy and Canadian society.

Lianne has years of experience on the Board of NGOs, as President of the Canadian Society of Agrometeorology, the Canadian Society of Agronomy, and Board member of a local advocacy group in the Ottawa area. She is also no stranger to AIC, having served on the Board from 2010 to 2018 including four years as Chair (2012-2016).
